

Web-Based
Scheduling

Appointments **EVERYWHERE**TM

Enjoy all the advantages of web-based scheduling without sacrificing speed or performance!

Now your organization can add a cutting-edge scheduling system without all the hassles and obstacles of a traditional software-based approach.

Focus on your practice, not your computers

You can get started at a low monthly rate with little more than an Internet connection. There's no upfront software expense or data storage investment. You don't have to add servers, software delivery apps or a costly Wide Area Network to connect multiple locations. And you don't have to maintain all that complex infrastructure. We do it for you! Every time you log on, you are using the latest version of the software.

Schedule smarter

AppointmentsEverywhere is a native web application -- it's not software "migrated" to the web -- so you enjoy a seamless user experience (unlike many web apps that hiccup and sputter). Developed by the scheduling specialists at SpectraSoft, *AppointmentsEverywhere* leverages the same advanced scheduling logic found in the company's industry-leading AppointmentsPRO scheduling software:

- ♦ Quick to learn, easy to use
- ♦ Schedule recurring, multi-resource appointments in seconds
- ♦ View and edit all of a patient's appointments on one screen
- ♦ Much more -- call to request a hosted tour and ask questions

- ♦ Low Upfront Costs!
- ♦ Access From Anywhere!
- ♦ Easy Implementation!
- ♦ No Software to Buy!
- ♦ No Servers!
- ♦ No Networking!
- ♦ No Upgrades to Buy!
- ♦ No Maintenance!
- ♦ Connect All Your Sites!

Security You Can Rely On

AppointmentsEverywhere deploys the same SSL security encryption used by banks to safeguard sensitive financial data over the Internet -- so your practice data will always remain safe and secure. All the technologies that *AppointmentsEverywhere* uses to transmit, store and display patient data, as well as the security features used to prevent unauthorized access to your system are all HIPAA-compliant.

SpectraSoftTM
The Practice Revenue Specialists

Choose the Edition that's right for you!

AppointmentsEverywhere comes in three editions with features for every size organization.

Clinic Edition

- All standard scheduling features (see list at right)
- Works with nearly any web browser
- One low monthly rate covers all support and service

Multi-Site Edition

All 'Clinic Edition' features plus:

- Schedules multiple locations
- Report breakdowns by location or department
- Conflict checking by location or department

Enterprise Edition

All 'Multi-Site Edition' features plus...

- Procedure, protocol and rules-based scheduling
- Hospital inpatient scheduling
- Reports broken down by organizational hierarchy

See and edit your schedule from anywhere

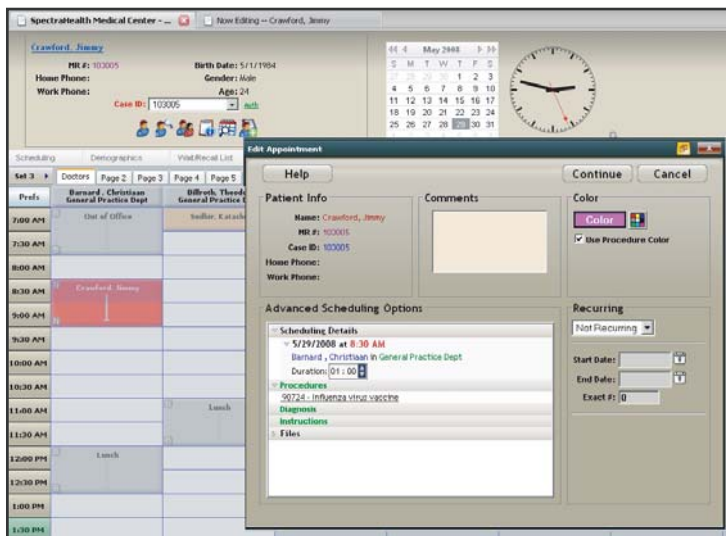

AppointmentsEverywhere works with a basic Internet connection -- even dial-up. (For best performance, a high-speed connection is required.) So it's ideal when you're on the road or away from your practice.

Works with nearly any machine, OS or browser

You won't have to replace hardware to profit from web scheduling. AppointmentsEverywhere is compatible with most browsers like MS Explorer and Firefox.

Connect multiple locations effortlessly

Centralize your entire practice under one scheduling system with AppointmentsEverywhere. You can schedule patients or view schedules at any of your locations as if you were there yourself. (This feature requires the "Multi-Site" service level or above.)

AppointmentsEverywhere features a streamlined, modern interface that makes quick work of patient intake, scheduling and administration.

Standard Scheduling Functions in AppointmentsEverywhere

- Schedule visits with multiple resources
- 'Find Appointment' scheduling logic
- Book recurring appointments
- Book multiple appointments in a time slot
- Schedule groups
- Block times for non-patient activities
- Hold time slots for by appointment type
- Track authorized visits remaining
- Track reasons for cancels and no-shows
- Manage unlimited resource schedules
- Assign time lengths to procedures
- Store multiple patient cases
- Automated wait list
- Resource-based scheduling
- See all patient appointments on a screen
- Audit changes to the schedule
- Customize screen views by user
- Mouse-over appointments to see details
- Color-code appointments
- Generate over 100 management reports covering patient activity, resource utilization, practitioner performance, administration, referral patterns, financials and more
